

Pesticide Use in the Greenhouse

The following steps must be taken when pesticides are to be used in the greenhouse:

1. A pesticide application notice must be filled out (accurately and completely) and a copy turned into the greenhouse office (there is a place to get them and turn them in right outside the GH office)
2. The pesticide application record board must be correctly filled out (located outside the GH office)
3. Pesticide danger/no entry signs must be posted at each entrance/exit to GH zone
4. Proper PPE must be worn (refer to MSDS sheets for proper PPE)
5. Signage must be taken down at the appropriate time

Thank you for your cooperation

Green House Superintendent
